May to October 2013 - "Newway", PHP – developer, main work was with MVC framework Yii.

Skills:

• know PHP, JavaScript;

• can work with DBMS MySQL and PostgreSQL;

• have some experience with HTML5, CSS;

- experienced Linux user(Ubuntu, CentOS);
- good understanding of object-oriented approach and design patterns;
- have work experience with WEB Services(REST), FoundationDB;
- ability to work with CVS - Git and SVN, IDE – NetBeans.

Personality:

Fast learning, responsible and goal-oriented, have teamwork experience.

I have experience with PHP frameworks such as Symfony 2, ZendFramework 2 and Yii 1(familiar with ZF1 and Yii2), also have basic knowledge of ExtJS (mainly with version 4.2), just know a little CSS and HTML (I'm mostly server-side developer). I am learning Javascript(ECMAScript 5) and know basics of JQuery. I haven't any experience with any CMS.

At a high level of understanding of object-oriented approach, got an idea about the design patterns.

I have experience with such databases: MySql, PostreSql, MsSql.

Besides PHP worked with object-oriented language such as C# (was learned at university) and Java (only basics).

I speak Russian and Ukrainian languages fluently, English - at the intermediate level.
